

Wiener Silvesterpfad

The Silvesterpfad in Vienna brought 750.000 people together at the annual New Year Eve's Trail. Netavis ensured a peaceful and entertaining celebration with it's Intelligent Video Surveillance Solution.

"We highly value Netavis flexible solution and its speedy implementation."

Michael Domkar
Project Manager, stadt wien marketing gmbh

The Challenge

750.000 people came together at the New Year's Trail in Vienna, also known as the Wiener Silvesterpfad, making it one of Europe's biggest new year's celebration. The annual New Year's Eve trail featured a 12-hour program of live musical performances at 14 venues and a spectacular firework show at midnight. 70 restaurateurs provided the visitors with delicacies. The locality of Graben in the city centre was transformed into Europe largest ballroom.

Netavis had the opportunity to provide the organisers stadt wien marketing gmbh and Fleck Elektroinstallationen GmbH with the Intelligent Video Surveillance solution to ensure a smoothly run celebration. The main challenge was the temporary set-up of a professional video surveillance system assuring high performance of the live transmission with full redundancy of the system.

The Solution

Once again Netavis intelligent video surveillance platform came into operation at the New Year's Eve Trail in 2018. This time around 30 IP cameras were running on 2 servers. The professional IP cameras provided high-resolution video material with PTZ function.

The system supports trained personnel in the control room to track live video streams on the video wall. The security staff could immediately assess the situation on the monitors and react quickly and accordingly.

The system was fully redundant, in the case of a server failure, the second server would instantly take over.

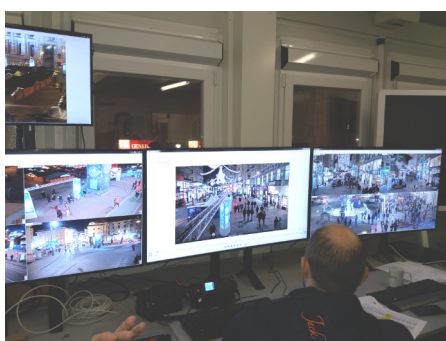

The Benefit

Fleck Elektroinstallationen GmbH and stadt wien marketing gmbh have a very reliable and flexible video surveillance system at their disposal, which contributes to ensure a peaceful and successful new year's celebration.

Due to the excellent picture quality even the smallest details can be recognised in the streams. Even in temporary situations, like at events, Netavis solutions can quickly and easily be set up as well as dismantled. Heavily frequented events require comprehensive live monitoring. Netavis provides a flexible and high performance PTZ control.

Since 2016 Netavis' security system has been operating at the annual and biggest new year eve's party in Austria.

INDUSTRY:	Event
LOCATION:	Vienna City Centre, Austria
PARTNER:	Fleck Elektroinstallationen GmbH
SOFTWARE VERSION:	Netavis Observer 4, Enterprise Edition
SPECIAL FEATURES:	Multimonitor Control, Mobile Control Room, Redundancy
TECHNICAL DETAILS:	approx. 30 cameras, 2 servers
